

KK770J

VSM COMPACTGRAIN

Grain type	Aluminium oxide granulate
Bonding	Full-resin bonded
Colour	Red-brown
Backing	J-Polyester
Flexibility	Flexible
Production width	1,090 mm

Materials

Stainless Steel
Unalloyed steel

Features

Low to medium pressure
Open coated

Also for wet grinding

Long-term compactgrain with a very open coating on a flexible polyester backing with continuous self-sharpening effect. KK770J is characterised by a consistent, very high stock removal with even surface roughness. It has a long service life when used for wide or long belt applications with low pressure.

Grit sizes:¹⁾

Benefits

- > Long-term abrasive with continual self-sharpening effect achieves extremely long service life
- > Reduction of grinding costs through lower tool consumption and fewer tool changes
- > For uniform workpiece surfaces and surface roughnesses with constant stock removal
- > Achieves particularly long service lives for stroke grinding applications with low contact pressure

Wear pattern of the grain

VSM COMPACTGRAIN series are completely made of granules which consist of numerous abrasive grains. The used grains are torn out by the cutting forces involved whereby unused grain tips are being exposed.
