VSM ILUMERON is produced using a product-specific manufacturing process where abrasive grains are evenly distributed across the face of the product (Figure 2). This results in a product with more consistent grain wear over a longer period of time.

The uniform consistency of VSM ILUMERON allows for maintaining tight tolerance levels with no “wild” marks (Figure 3). What’s more is the product’s ability to combine grinding and polishing in a single step, while reducing operational noise.

▶ VSM ILUMERON was designed for low to medium-pressure applications on stainless steel, superalloys and unalloyed steel.

SYMBOL KEY	
TS	TOP SIZE (helps reduce friction and heat)
ST	STEARATE (helps prevent loading)
AS	ANTISTATIC
◆	Suitable for Wet Applications
■	Stocked Product
□	Available, Not Stocked
○	For low to medium contact pressure
◎	For medium contact pressure
●	For medium to high contact pressure

Availability is subject to change.

Grinding of stainless steel surface

Product	Gloss Unit (GU)*
VSM ILUMERON 1200 Grit	 GU 153
Similar competitor product 1200 Grit	 GU 23

*The **Gloss Unit (GU)** is the measuring unit of a gloss meter. A zero (0) value represents a perfect matte finish, while a value of 70 represents a typical high-gloss (high-shine) surface.
